Subject: Question re: hardness dependent criteria values

Hi Pete, I hope you had a fun weekend with your honey and the pooches!

I'm going through ND's draft WQS and have a couple of questions regarding the hardness dependent aquatic life criteria values.

What data are you using to show 400 mg/L is the most representative of the state's waters?

If you have the spreadsheet you used to calculate the revised hardness dependent criteria values, would you mind sharing it with me?

Thanks - and have a great evening!

Holly
